# STOCK MARKET TRACKER

AN API BASED STOCK PRICE TRACKER

Presented by: **Team Brokers**

A decorative geometric pattern on the left side of the slide. It features a large light blue circle, a dark blue square with concentric circles, a purple square with concentric circles, and a pink square with concentric circles. A small dark blue circle is positioned at the intersection of the purple and pink squares.

- Real World Application
- Future Scope
- Conclusion

# INTRODUCTION

- In today's fast-paced financial world, understanding the stock market can be overwhelming for beginners.
- Our project- Stock Market Tracker – is designed to simplify the journey into investing.
- With a clean interface and simulated trading features, we aim to make stock market tracking both accessible and informative for new users.

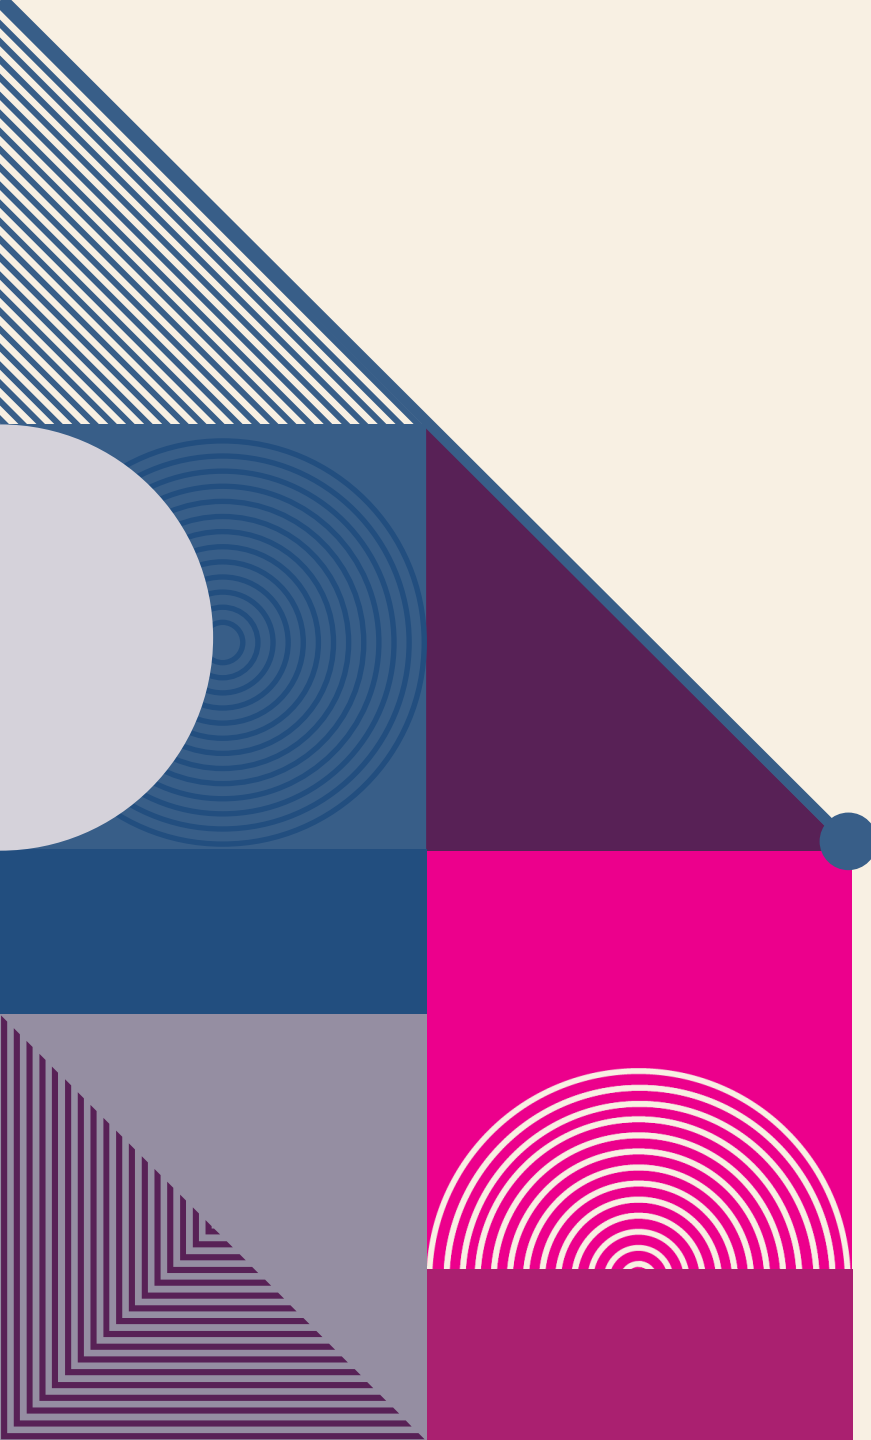

# OBJECTIVES

- **Simplify** the process of tracking stock prices
- **Educate** users about basic stock market concepts
- Provide an **intuitive interface** for beginners
- **Encourage financial literacy** among students and first-time investors

# TECHNOLOGY STACK

- **Frontend:** HTML, CSS, JavaScript
- **Backend:** API integration (Financial data from static or demo sources) , chart.js
- **Styling Theme:** Inspired by real stock market dashboards (groww).
- **APIs:** multiple finance APIs along with the data
- **Tools Used:** VS Code, GitHub, web browser for testing

A decorative geometric pattern on the left side of the slide. It features a large light blue circle in the upper left, a dark blue square with concentric circles below it, a purple triangle to the right of the circle, a solid magenta square below the purple triangle, and a grey square with a diagonal line pattern at the bottom left. A small dark blue circle is positioned at the intersection of the purple triangle and the magenta square.

## About the Project

Stock Market Tracker is a real-time stock price tracker developed by a team of passionate students. Designed to reflect the dynamic nature of the stock market. Our aim was to build a simple, functional application powered by real-time data through an API. Which can reflect the data to the user according to their need and also give the information about the share market in a easier way.

## Meet the Team

### Aman Shaikh

[LinkedIn](#)

Backend Developer & Project Lead.  
Handled API integration and  
backend logic. Managed project  
execution.

### Kunal Kalbande

[LinkedIn](#)

Project Planner & Design. Organized  
project structure, tracked progress,  
and supported development  
consistency.

### Sarvesh Joshi

[LinkedIn](#)

Frontend Developer. Built and styled  
user interface, integrated data.

### Saurabh Yadav

[LinkedIn](#)

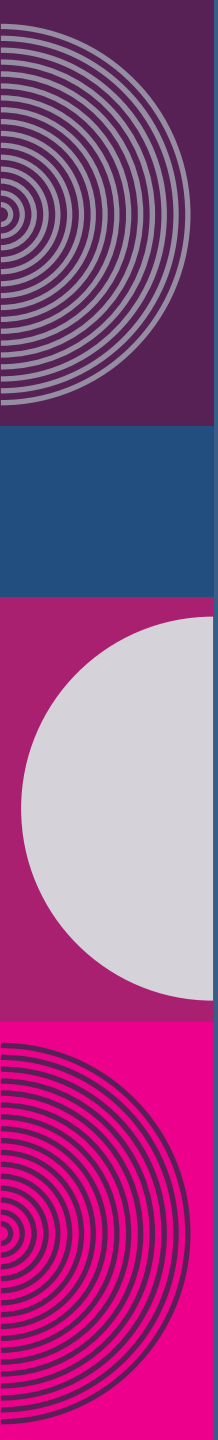

Frontend Developer. Worked on  
enhancements and contributed to  
layout design.

# REAL WORLD APPLICATION

- **Beginner Tool:** Perfect starting point before using real trading apps.
- **Educational Value:** Ideal for students and finance workshops.
- **Community Learning:** Can be used in peer groups or college clubs.
- **Classroom Use:** Helpful for practical sessions in finance courses.

# FUTURE SCOPE

- **Real-Time API Integration:** Add live stock market data.
- **User Accounts:** Personalized portfolios with login/signup.
- **Mobile App:** Expand to Android/iOS platforms.
- **Gamified Learning:** Quizzes and rewards for engagement.
- **IPO & Small-Cap Tracking:** Broaden investment insights.
- **Google Sheets Sync:** Export data for custom analysis

# CONCLUSION

- Our Stock Price Tracker project goes beyond just displaying market data – it introduces beginners to the world of investing in a simplified, engaging, and educational way.
- With its intuitive design, key features tailored for new users, and potential for future enhancements, the platform lays a strong foundation for financial literacy and informed decision-making.
- As we continue to evolve it with real-time data, personalization, and mobile accessibility, this project has the potential to become a valuable tool for aspiring investors and learners everywhere.

**THANK YOU**
